Investigations into the Ecology of Microbial Biofilms

Interested in a career in the sciences? Don't miss this opportunity to enroll in a course that will give you hands-on experience in a laboratory setting investigating the ecology of microbial biofilms. This class will give you the chance to explore primary scientific literature and participate in the scientific method as we work to identify potential inhibitors and/or promoters of biofilm formation by the pathogen *Pseudomonas aeruginosa*.

Opportunity to do independent research

Interdisciplinary team-taught course that gives you access to 2 instructors

Small Class Size

Open to Honors Students

Tuesdays 12:30-1:45

Thursdays 11:30-1:45

OAKTON COMMUNITY COLLEGE

1600 East Golf Road
Des Plaines, IL 60016
